

Dynamic DB Permission API

Overview

The Dynamic DB Permission API provides endpoints for managing Database and Menu permissions. These APIs allow administrators to grant, revoke, update, and check permissions for users and groups on databases and menu nodes.

Base URL: `${API_VERSION}/dynamic-db/permissions`

Common Headers:

```
1 Content-Type: application/json
2 Authorization: Bearer {token}
3
```

Common Response Format:

```
1 {
2   "code": "200",
3   "data": { ... },
4   "message": "success",
5   "result": true
6 }
7
```

API Endpoints

1. Get Database Member List

Endpoint: `GET /dynamic-db/permissions/database/{databaseId}/members`

Description: Retrieve the list of members who have access to a specific database.

Path Parameters

Parameter	Type	Required	Description
databaseId	string	Yes	Database ID (UUID)

Request Example

```
1 GET /dynamic-db/permissions/database/47da8e81-8907-48aa-b21d-fe418475ab61/members
```

Response Example

```
1 {
2   "code": 200,
3   "data": [
4     {
5       "permissionRecordId": "01KQXEN9JGZVZDSXVQPDWFZTZ",
6       "targetId": "administrator",
7       "targetType": 1,
8       "permissionLevel": "Manage",

```

```

9         "isInherit": false,
10        "inheritFrom": null,
11        "createdAt": "2026-05-06T09:32:55.23623"
12    }
13 ],
14 "message": "success",
15 "result": true
16 }

```

2. Grant Member Access to Database

Endpoint: POST /dynamic-db/permissions/database/{databaseId}/grant

Description: Invite a user or group to access the database with specified permission level (Member or Manage).

Permission Required: User must have Manage permission on the database.

Path Parameters

Parameter	Type	Required	Description
databaseId	string	Yes	Database ID (UUID)

Request Parameters

Parameter	Type	Required	Description
targetType	integer	Yes	Target type: 1-User, 2-Role, 3-Group
targetId	string	Yes	Target ID (user ID or group ID)
permissionLevel	string	Yes	Permission level: Member or Manage

Request Example

```

1 {
2   "targetType": 3,
3   "targetId": "testg1",
4   "permissionLevel": "Member"
5 }

```

Response Example

```

1 {
2   "code": 200,
3   "data": {
4     "configurationRuleName": null,
5     "createTime": "2026-05-06T09:38:55.902765895",
6     "id": "01KQXF09RZ6XZ4VRMCXHE1T3V2",
7     "members": null,
8     "permissionIds": [
9       47
10    ],
11    "permissionLevel": "Member",
12    "resourceId": "47da8e81-8907-48aa-b21d-fe418475ab61",
13    "resourceType": 2,
14    "rules": null,
15    "targetId": "testg1",
16    "targetType": 3,
17    "updateTime": "2026-05-06T09:38:55.902779695"
18  },
19  "message": "success",
20  "result": true

```

3. Revoke Member from Database

Endpoint: DELETE /dynamic-

db/permissions/database/{databaseId}/revoke/{permissionId}

Description: Remove a member's access from the database.

Permission Required: User must have Manage permission on the database.

Path Parameters

Parameter	Type	Required	Description
databaseId	string	Yes	Database ID (UUID)
permissionId	string	Yes	Permission ID to revoke

Request Example

```
1 DELETE /dynamic-db/permissions/database/47da8e81-8907-48aa-b21d-
  fe418475ab61/revoke/01KQXF09RZ6XZ4VRMCXHE1T3V2
```

Response Example

```
1 {
2   "code": 200,
3   "data": true,
4   "message": "success",
5   "result": true
6 }
7
```

4. Update Database Member Permission

Endpoint: PUT /dynamic-db/permissions/database/{databaseId}/update-
permission/{permissionId}

Description: Update a database member's permission level (Member ↔ Manage).

Permission Required: User must have Manage permission on the database.

Path Parameters

Parameter	Type	Required	Description
databaseId	string	Yes	Database ID (UUID)
permissionId	string	Yes	Permission ID to update

Request Parameters

Parameter	Type	Required	Description
permissionLevel	string	Yes	New permission level: Member or Manage

Request Example

```

1 {
2   "permissionLevel": "Manage"
3 }

```

Response Example

```

1 {
2   "code": 200,
3   "data": {
4     "configurationRuleName": null,
5     "createTime": "2026-05-06T09:38:55.902766",
6     "id": "01KQXF09RZ6XZ4VRMCXHE1T3V2",
7     "members": null,
8     "permissionIds": [
9       48,
10      49
11    ],
12    "permissionLevel": "Manage",
13    "resourceId": "47da8e81-8907-48aa-b21d-fe418475ab61",
14    "resourceType": 2,
15    "rules": null,
16    "targetId": "testg1",
17    "targetType": 3,
18    "updateTime": "2026-05-06T09:41:07.751851"
19  },
20  "message": "success",
21  "result": true
22 }

```

5. Get Menu Permission List

Endpoint: GET /dynamic-db/permissions/menu/{menuId}/permissions

Description: Retrieve the list of permissions configured for a specific menu node.

Permission Required: User must have Manage permission on the menu.

Path Parameters

Parameter	Type	Required	Description
menuId	string	Yes	Menu node ID (UUID)

Request Example

```

1 GET /dynamic-db/permissions/menu/772274f2-3bd7-4578-97b4-6c576d6c718f/permissions

```

Response Example

```

1 {
2   "code": 200,
3   "data": [
4     {
5       "permissionRecordId": "01KQXFMAZ2HM6V047E2Y9MVN50",
6       "targetId": "administrator",
7       "targetType": 1,
8       "permissionLevel": "Manage",
9       "isInherit": false,
10      "inheritFrom": null,
11      "createdAt": "2026-05-06T09:49:52.482473"
12    }
13  ],

```

```
14     "message": "success",
15     "result": true
16 }
```

6. Grant Permission on Menu Node

Endpoint: POST /dynamic-db/permissions/menu/{menuId}/grant

Description: Grant permission to a user or group on a menu node (View, Edit, or Manage).

Permission Required: User must have Manage permission on the menu.

Path Parameters

Parameter	Type	Required	Description
menuId	string	Yes	Menu node ID (UUID)

Request Parameters

Parameter	Type	Required	Description
targetType	integer	Yes	Target type: 1-User, 2-Role, 3-Group
targetId	string	Yes	Target ID (user ID or group ID)
permissionLevel	string	Yes	Permission level: View, Edit, or Manage

Request Example

```
1 {
2     "targetType": 3,
3     "targetId": "testg1",
4     "permissionLevel": "Edit"
5 }
```

Response Example

```
1 {
2     "code": 200,
3     "data": {
4         "configurationRuleName": null,
5         "createTime": "2026-05-06T09:54:03.57508433",
6         "id": "01KQXFW05QHK7PST4H642YSTWN",
7         "members": null,
8         "permissionIds": [
9             51,
10            52
11        ],
12        "permissionLevel": "Edit",
13        "resourceId": "772274f2-3bd7-4578-97b4-6c576d6c718f",
14        "resourceType": 21,
15        "rules": null,
16        "targetId": "testg1",
17        "targetType": 3,
18        "updateTime": "2026-05-06T09:54:03.57510583"
19    },
20     "message": "success",
21     "result": true
22 }
```

7. Revoke Permission from Menu Node

Endpoint: DELETE /dynamic-db/permissions/menu/{menuId}/revoke/{permissionId}

Description: Remove a permission entry from a menu node.

Permission Required: User must have Manage permission on the menu.

Path Parameters

Parameter	Type	Required	Description
menuId	string	Yes	Menu node ID (UUID)
permissionId	string	Yes	Permission ID to revoke

Request Example

```
1 DELETE /dynamic-db/permissions/menu/9619596f-d1de-4843-961f-
f1e9b978d3eb/revoke/01KQ9HGQ67GANV4CQ8E3STHHGX
```

Response Example

```
1 {
2   "code": "200",
3   "data": true,
4   "message": "success",
5   "result": true
6 }
7
```

8. Update Menu Permission Level

Endpoint: PUT /dynamic-db/permissions/menu/{menuId}/update-permission/{permissionId}

Description: Update the permission level for a user or group on a menu node (View / Edit / Manage).

Permission Required: User must have Manage permission on the menu.

Path Parameters

Parameter	Type	Required	Description
menuId	string	Yes	Menu node ID (UUID)
permissionId	string	Yes	Permission ID to update

Request Parameters

Parameter	Type	Required	Description
permissionLevel	string	Yes	New permission level: View, Edit, or Manage

Request Example

```
1 {
2   "permissionLevel": "View"
3 }
```

Response Example

```
1 {
2   "code": 200,
3   "data": {
4     "configurationRuleName": null,
5     "createTime": "2026-05-06T09:54:03.575084",
6     "id": "01KQXFW05QHK7PST4H642YSTWN",
7     "members": null,
8     "permissionIds": [
9       50
10    ],
11    "permissionLevel": "View",
12    "resourceId": "772274f2-3bd7-4578-97b4-6c576d6c718f",
13    "resourceType": 21,
14    "rules": null,
15    "targetId": "testg1",
16    "targetType": 3,
17    "updateTime": "2026-05-06T09:56:22.989357"
18  },
19  "message": "success",
20  "result": true
21 }
```

Appendices

Resource Types

Resource Type	Description
2	Database
21	Menu

Target Types

Target Type	Description
1	User
2	Role
3	Group

Permission Levels - Database

Permission Level	Description
Member	Can view and use the database
Manage	Can manage database settings and permissions

Permission Levels - Menu

Permission Level	Description
View	Can view the menu node
Edit	Can view and edit content in the menu node
Manage	Can manage menu node settings and permissions
